## **Corruption: A Study in Political Economy** Susan Rose-Ackerman

Corruption: A Study in Political Economy focuses on the problem of corruptions in political economy and functional bribery. This book is organized into four parts encompassing 11 chapters. Chapters 2 to 4 deal with the fundamental relationship among voters, legislators, and interest groups, as well as the role of the government bureaucracy in shaping legislative choices. Chapter 5 illustrates the basic relationships with an analysis of a monopolistic government official charged with allocating a benefit through a queuing system, while Chapter 6 retains the assumption of a single official with monopoly power but moves beyond the queuing model to consider alternative sanctioning strategies, a wider variety of bureaucratic tasks, and bribers who may be competitively or monopolistically organized. Chapters 7 and 8 explore the potential of a system where officials are permitted to compete with one another in processing applications for governmental benefits. Under this system, an individual or firm rejected by one official can seek the benefit from other bureaucrats. Chapter 9 introduces a final administrative variable into the analysis, while Chapter 10 discusses the governmental corruption to analogous corrupt activities entirely within the private sector. Lastly, Chapter 11 looks into the relation between corruption and democratic theory, the possibility of reforming corrupt bureaucracies, and the link between economics and morality. This book will be of value to public servants, legislators, economists, sociologists, and researchers.
