Real Estate: Property Markets and Sustainable Behaviour (Natural and Built Environment Series)

Peter Dent, Michael Patrick, Xu Ye

Traditional studies of the property market have tended to focus solely on commercial and legal issues, but the growing importance of the issue of sustainability means that a different approach is needed.

This new textbook provides an overview of property within a market context, examining the complex nature of property rights and issues related to both investors and occupiers. At the same time it assesses property from the perspective of financial, social and environment sustainability. Topics covered range from the characteristics of property and depreciation, to ownership and development through to investments and sustainability reporting. The book concludes with key skills in sustainable knowledge needed by those working in the real estate industry.

Written by an author team of experienced property professionals, this essential introductory textbook is well suited for property, planning and architecture students on undergraduate, graduate and conversion courses, as well as those on CPD and training programmes in related areas.
