Space/Terrestrial Mobile Networks: Internet Access and QoS Support

Space/Terrestrial Mobile Networks: Internet Access and QoS Support

Space/Terrestrial Mobile Networks Internet Access and QoS Support covers the design of a Global Mobile Broadband System (GMBS) based on the results of the European Commission's Framework Programme 5 Information Society Technologies (IST) Project SUITED. Many of the latest concept in mobility solutions, network design techniques and internet technologies are presented. The SUITED project has addressed a number of technical issues that are very much state-of-the-art. The presentation of such material in the form of a design of a real network provides a unique source of information.

This book:

- Addresses the important topic of heterogeneous networks and the underlying technologies
- Describes how to design an integrated satellite/terrestrial infrastructure where all the network components are fully merged together and integrated with the Internet Core network
- Presents the service scenarios and system requirements of the Global Mobile Broadband System (GMBS)
- Discusses the necessary QoS support and defines the novel admission control scheme Gauge & Gate Reservation with Independent Probing (GRIP)
- Covers mobility management including Mobile-IP support and a QoS Support Module (QASM)
- Describes the functional and network architectures and presents signalling protocols for mobility management in GMBS
- Presents the design of signalling protocols and their implementation using the Specification and Description Language (SDL)

Space/Terrestrial Mobile Networks Internet Access and QoS Support has an accessible and practical approach to the subject and addresses in detail, the important topic of heterogeneous networks and the underlying technologies that make this concept possible.

From reader reviews:

Shelia Coggins:

Do you have favorite book? When you have, what is your favorite's book? Book is very important thing for us to learn everything in the world. Each e-book has different aim or even goal; it means that book has different type. Some people feel enjoy to spend their the perfect time to read a book. They are really reading whatever they acquire because their hobby is reading a book. Why not the person who don't like studying a book? Sometime, man feel need book when they found difficult problem as well as exercise. Well, probably you should have this Space/Terrestrial Mobile Networks: Internet Access and QoS Support.

Yasmin Parker:

Have you spare time to get a day? What do you do when you have far more or little spare time? Sure, you can choose the suitable activity intended for spend your time. Any person spent all their spare time to take a wander, shopping, or went to often the Mall. How about open or even read a book allowed Space/Terrestrial Mobile Networks: Internet Access and QoS Support? Maybe it is to be best activity for you. You realize beside you can spend your time using your favorite's book, you can better than before. Do you agree with their opinion or you have other opinion?

Carrie Porter:

A lot of people always spent all their free time to vacation or maybe go to the outside with them loved ones or their friend. Do you know? Many a lot of people spent they free time just watching TV, as well as playing video games all day long. If you would like try to find a new activity here is look different you can read a book. It is really fun for you personally. If you enjoy the book that you read you can spent 24 hours a day to reading a guide. The book Space/Terrestrial Mobile Networks: Internet Access and QoS Support it doesn't matter what good to read. There are a lot of individuals who recommended this book. These folks were enjoying reading this book. In case you did not have enough space bringing this book you can buy the e-book. You can m0ore effortlessly to read this book out of your smart phone. The price is not very costly but this book offers high quality.

John Harrison:

Space/Terrestrial Mobile Networks: Internet Access and QoS Support can be one of your nice books that are good idea. Many of us recommend that straight away because this guide has good vocabulary that could increase your knowledge in vocab, easy to understand, bit entertaining but delivering the information. The writer giving his/her effort to get every word into joy arrangement in writing Space/Terrestrial Mobile Networks: Internet Access and QoS Support however doesn't forget the main place, giving the reader the hottest and also based confirm resource information that maybe you can be one among it. This great information could drawn you into completely new stage of crucial contemplating.
