Resources, Governance and Civil Conflict (Routledge/ECPR Studies in European Political Science)

Resources, Governance and Civil Conflict (Routledge/ECPR Studies in European Political Science)

This book explores how governance structures - domestic political institutions, international peacekeeping efforts, armed interventions by other states - and natural resources affect the onset, dynamics and the termination of civil wars.

Written by leading researchers in the field of conflict research, it provides new insights into, and offers fresh perspectives on the role of governance structures and resources in civil conflict, suggesting that many of the same set of factors play important roles in the onset and dynamics of civil conflict as well as in the termination of such conflicts and in post-conflict stability. Presenting a variety of theoretical approaches and case studies on India, Sudan, the Basque country and Costa Rica, *Governance, Resources and Civil Conflict* will be of interest to students and scholars of politics, international relations and conflict studies.
