Green Supply Chain Management

Joseph Sarkis

Green Supply Chain Management Joseph Sarkis

This monograph focuses on the issues facing sustainability in supply chains. Specifically it provides an overview of green supply chain management (GSCM) and the management of technology within this context. The topics include the operational and technological activities and characteristics of GSCM management. Organizational greening activities that play a role in GSCM operations are presented. The monograph also provides functional activities of the GSCM which include supplier management, internal operations management, logistics, and reverse logistics issues. Managerial considerations related to planning, justifying, and implementing GSCM and the respective technologies provide some insights into management decisions that will be faced in this environment. The references and bibliography provide a dozens of additional readings for those interested in this emergent and complex issue.
