Neural and Fuzzy Logic Control of Drives and Power Systems

Marcian Cirstea, Andrei Dinu, Malcolm McCormick, Jeen Ghee Khor

Neural and Fuzzy Logic Control of Drives and Power Systems Marcian Cirstea, Andrei Dinu, Malcolm McCormick, Jeen Ghee Khor

The authors guide readers quickly and concisely through the complex topics of neural networks, fuzzy logic, mathematical modelling of electrical machines, power systems control and VHDL design. Unlike the academic monographs that have previously been published on each of these subjects, this book combines them and is based round case studies of systems analysis, control strategies, design, simulation and implementation. The result is a guide to applied control systems design that will appeal equally to students and professional design engineers. The book can also be used as a unique VHDL design aid, based on real-world power engineering applications.

*Introduces cutting-edge control systems to a wide readership of engineers and students

*The first book on neuro-fuzzy control systems to take a practical, applications-based approach, backed up with worked examples and case studies

*Learn to use VHDL in real-world applications

From reader reviews:

Royce Britton:

The book Neural and Fuzzy Logic Control of Drives and Power Systems give you a sense of feeling enjoy for your spare time. You can utilize to make your capable a lot more increase. Book can being your best friend when you getting anxiety or having big problem with your subject. If you can make studying a book Neural and Fuzzy Logic Control of Drives and Power Systems to become your habit, you can get far more advantages, like add your personal capable, increase your knowledge about a number of or all subjects. You could know everything if you like open up and read a book Neural and Fuzzy Logic Control of Drives and Power Systems. Kinds of book are several. It means that, science book or encyclopedia or others. So , how do you think about this guide?

Thanh Johnson:

Now a day people that Living in the era wherever everything reachable by interact with the internet and the resources in it can be true or not need people to be aware of each data they get. How individuals to be smart in receiving any information nowadays? Of course the reply is reading a book. Studying a book can help people out of this uncertainty Information specially this Neural and Fuzzy Logic Control of Drives and Power Systems book since this book offers you rich information and knowledge. Of course the information in this book hundred per cent guarantees there is no doubt in it as you know.

Tony Sanford:

Do you really one of the book lovers? If so, do you ever feeling doubt if you find yourself in the book store? Try and pick one book that you just dont know the inside because don't evaluate book by its include may doesn't work is difficult job because you are frightened that the inside maybe not while fantastic as in the outside seem likes. Maybe you answer may be Neural and Fuzzy Logic Control of Drives and Power Systems why because the wonderful cover that make you consider regarding the content will not disappoint a person. The inside or content is usually fantastic as the outside or cover. Your reading sixth sense will directly assist you to pick up this book.

Paula Mayo:

You can spend your free time to learn this book this publication. This Neural and Fuzzy Logic Control of Drives and Power Systems is simple to bring you can read it in the park your car, in the beach, train and also soon. If you did not have got much space to bring often the printed book, you can buy the e-book. It is make you quicker to read it. You can save the particular book in your smart phone. Consequently there are a lot of benefits that you will get when one buys this book.
