These notes constitute a faithful record of a short course of lectures given in São Paulo, Brazil, in the summer of 1968. The audience was assumed to be familiar with the basic material of homology and homotopy theory, and the object of the course was to explain the methodology of general cohomology theory and to give applications of K-theory to familiar problems such as that of the existence of real division algebras. The audience was not assumed to be sophisticated in homological algebra, so one chapter is devoted to an elementary exposition of exact couples and spectral sequences.

From reader reviews:

Guy Gregory:

In this 21st one hundred year, people become competitive in each and every way. By being competitive at this point, people have do something to make these individuals survives, being in the middle of typically the crowded place and notice simply by surrounding. One thing that at times many people have underestimated the item for a while is reading. Yep, by reading a guide your ability to survive boost then having chance to stand than other is high. For yourself who want to start reading any book, we give you this General Cohomology Theory and K-Theory (London Mathematical Society Lecture Note Series) book as nice and daily reading publication. Why, because this book is greater than just a book.

Marie Williams:

Here thing why this specific General Cohomology Theory and K-Theory (London Mathematical Society Lecture Note Series) are different and trusted to be yours. First of all reading a book is good but it depends in the content than it which is the content is as delicious as food or not. General Cohomology Theory and K-Theory (London Mathematical Society Lecture Note Series) giving you information deeper and different ways, you can find any publication out there but there is no publication that similar with General Cohomology Theory and K-Theory (London Mathematical Society Lecture Note Series). It gives you thrill reading through journey, its open up your own eyes about the thing that will happened in the world which is possibly can be happened around you. It is possible to bring everywhere like in playground, café, or even in your means home by train. Should you be having difficulties in bringing the paper book maybe the form of General Cohomology Theory and K-Theory (London Mathematical Society Lecture Note Series) in e-book can be your substitute.

Lois Wiggins:

Information is provisions for those to get better life, information presently can get by anyone at everywhere. The information can be a knowledge or any news even a huge concern. What people must be consider while those information which is inside the former life are challenging be find than now could be taking seriously which one works to believe or which one typically the resource are convinced. If you receive the unstable resource then you get it as your main information you will have huge disadvantage for you. All those possibilities will not happen in you if you take General Cohomology Theory and K-Theory (London Mathematical Society Lecture Note Series) as your daily resource information.

Sanjuanita Mecham:

In this era globalization it is important to someone to find information. The information will make a professional understand the condition of the world. The fitness of the world makes the information simpler to share. You can find a lot of referrals to get information example: internet, newspapers, book, and soon. You can see that now, a lot of publisher that print many kinds of book. Often the book that recommended to you

personally is General Cohomology Theory and K-Theory (London Mathematical Society Lecture Note Series) this book consist a lot of the information in the condition of this world now. This kind of book was represented so why is the world has grown up. The vocabulary styles that writer use for explain it is easy to understand. The particular writer made some study when he makes this book. This is why this book suitable all of you.
