Materials for the Hydrogen Economy

Materials for the Hydrogen Economy

Hydrogen offers a promising alternative for supplying clean and sustainable energy to meet increasing demands worldwide. However, materials are key to transforming the technology into a viable industry.

Materials for the Hydrogen Economy describes the technical challenges and the current efforts in developing materials possessing the properties required for handling each stage of the hydrogen fuel chain. Thorough coverage offers newcomers as well as experienced engineers and researchers a reliable and fully scalable foundation in this field.

This book covers all seven of the current hydrogen production methods, as well as distribution, storage, and utilization technologies, particularly fuel cells. It details the chemical reactions, processes, types of feedstock, and commercial equipment involved in hydrogen production. It also covers methods, membranes, liners, and sensors used for separating, sealing, and purifying hydrogen. Several chapters examine corrosion effects in pipeline steels and other storage and transportation vessels, leading to discussions of hydrogen permeation barriers, barrier coatings, and hydrides for on-board hydrogen storage. The final chapters focus on electrolytes and component materials for solid-oxide fuel cells (SOFCs) and H₂/O₂ PEM fuel cells.

Materials for the Hydrogen Economy provides a broad review of material requirements for handling hydrogen from production to market. It explores the development of these materials alongside essential considerations and issues associated with their deployment.

From reader reviews:

Karen Ruiz:

Nowadays reading books are more than want or need but also be a life style. This reading practice give you lot of advantages. The benefits you got of course the knowledge the particular information inside the book which improve your knowledge and information. The information you get based on what kind of reserve you read, if you want get more knowledge just go with training books but if you want truly feel happy read one using theme for entertaining like comic or novel. Typically the Materials for the Hydrogen Economy is kind of guide which is giving the reader capricious experience.

Linda King:

Information is provisions for people to get better life, information presently can get by anyone from everywhere. The information can be a know-how or any news even a problem. What people must be consider any time those information which is within the former life are hard to be find than now's taking seriously which one is appropriate to believe or which one typically the resource are convinced. If you get the unstable resource then you have it as your main information we will see huge disadvantage for you. All those possibilities will not happen with you if you take Materials for the Hydrogen Economy as your daily resource information.

Clarine Davidson:

Do you have something that you enjoy such as book? The publication lovers usually prefer to choose book like comic, quick story and the biggest some may be novel. Now, why not seeking Materials for the Hydrogen Economy that give your fun preference will be satisfied through reading this book. Reading addiction all over the world can be said as the opportunity for people to know world considerably better then how they react to the world. It can't be said constantly that reading behavior only for the geeky particular person but for all of you who wants to always be success person. So , for all of you who want to start studying as your good habit, you may pick Materials for the Hydrogen Economy become your personal starter.

Charles Howell:

Don't be worry if you are afraid that this book will certainly filled the space in your house, you will get it in e-book means, more simple and reachable. This particular Materials for the Hydrogen Economy can give you a lot of pals because by you checking out this one book you have issue that they don't and make a person more like an interesting person. This specific book can be one of one step for you to get success. This guide offer you information that probably your friend doesn't learn, by knowing more than different make you to be great individuals. So , why hesitate? Let's have Materials for the Hydrogen Economy.
