Work, Self and Society: After Industrialism Catherine Casey

Despite recent interest in the effects of restructuring and redesigning the work place, the link between individual identity and structural change has usually been asserted rather than demonstrated. Through an extensive review of data from field work in a multi-national corporation Catherine Casey changes this. She knows that changes currently occurring in the world of work are part of the vast social and cultural changes that are challenging the assumptions of modern industrialism. These events affect what people do everyday, and they are altering relations among ourselves and with the physical world. This valuable book is not only a critical analysis of the transformations occurring in the world of work, but an exploration of the effects of contemporary practices of work on the self.
