Drought: Research and Science-Policy Interfacing

Drought: Research and Science-Policy Interfacing

Droughts occur in arid and semi-arid areas of the world, but also in humid areas, and can develop over short periods (flash drought) or longer periods (seasons/decades). Even though progress has been made, it remains difficult to adequately characterize, monitor, forecast and manage droughts, due to their multi-faceted nature.

Usually, drought does not directly cause fatalities, but a wide range of socio-economic and environmental effects may occur, and, depending on the region, water-and food-related diseases and casualties can be triggered. Europe has regularly been hit hard by drought (e.g. recently Russia), and large portions of USA, Mexico, Brazil, China, India, Central Asia, South Africa, the Great Horn of Africa, or Australia, have been affected by drought. So globally, drought affects more regions, and more people, than other natural hazards.

Additionally, climate change projections for many areas indicate that droughts are likely to become more frequent and more severe due to the increased variability of precipitation and temperature, tied in some cases to decreased average precipitation and increased average temperature. Hence, there is an urgent need to improve drought preparedness through measures that reduce vulnerability to drought and the risks they pose, in particular considering the uncertain future.

Drought. Research and Science Policy Interfacing includes contributions to the International Conference on DROUGHT: Research and Science-Policy Interfacing (Valencia, Spain, 10-13 March 2015), the final event of the EU FP7 research project DROUGHT-R&SPI (Fostering European Drought Research and Science-Policy Interfacing). The book aims to foster development of drought policies and plans to reduce risk and vulnerability, and to enhance preparedness and resilience.

The book addresses the following topics: (1) past, present and future of droughts (natural hazards, identification and characterization, impacts); (2) indicators, monitoring and forecasting (including early warning systems), risk and vulnerability assessment and reduction at different scales, and (3) preparedness and mitigation options (risk and vulnerability perception, water management and governance under drought

conditions, design and implementation of drought policies and plans from the local to the regional, national and international levels, research Interfaces with drought policies).

Drought. Research and Science Policy Interfacing will be of interest to researchers and professionals in those fields related to drought, such as climatology, meteorology, hydrology, agronomy, ecology, water economy, and water management, as well as to policy makers involved in drought preparedness and mitigation strategies at local, regional, national and international levels.

From reader reviews:

Albert Aucoin:

Do you have favorite book? In case you have, what is your favorite's book? Publication is very important thing for us to know everything in the world. Each publication has different aim or goal; it means that book has different type. Some people experience enjoy to spend their a chance to read a book. They can be reading whatever they take because their hobby will be reading a book. Why not the person who don't like studying a book? Sometime, person feel need book when they found difficult problem or perhaps exercise. Well, probably you will require this Drought: Research and Science-Policy Interfacing.

Gregorio Leslie:

Throughout other case, little people like to read book Drought: Research and Science-Policy Interfacing. You can choose the best book if you love reading a book. Provided that we know about how is important any book Drought: Research and Science-Policy Interfacing. You can add knowledge and of course you can around the world by the book. Absolutely right, mainly because from book you can know everything! From your country till foreign or abroad you may be known. About simple issue until wonderful thing it is possible to know that. In this era, we could open a book as well as searching by internet device. It is called e-book. You can use it when you feel fed up to go to the library. Let's learn.

Theo Garcia:

People live in this new time of lifestyle always try to and must have the time or they will get wide range of stress from both lifestyle and work. So, whenever we ask do people have extra time, we will say absolutely yes. People is human not really a robot. Then we request again, what kind of activity do you have when the spare time coming to you of course your answer will certainly unlimited right. Then do you ever try this one, reading books. It can be your alternative in spending your spare time, the book you have read is Drought: Research and Science-Policy Interfacing.

Eileen Vaughan:

Do you like reading a reserve? Confuse to looking for your favorite book? Or your book had been rare? Why so many question for the book? But almost any people feel that they enjoy for reading. Some people likes studying, not only science book but also novel and Drought: Research and Science-Policy Interfacing or even others sources were given knowledge for you. After you know how the fantastic a book, you feel would like to read more and more. Science publication was created for teacher or even students especially. Those books are helping them to add their knowledge. In other case, beside science book, any other book likes Drought: Research and Science-Policy Interfacing to make your spare time much more colorful. Many types of book like this one.
