*Yi Lin, Shoucheng OuYang*

## **Irregularities and Prediction of Major Disasters (Systems Evaluation, Prediction, and Decision-Making)** Yi Lin, Shoucheng OuYang

Although scientists have effectively employed the concepts of probability to address the complex problem of prediction, modern science still falls short in establishing true predictions with meaningful lead times of zero-probability major disasters. The recent earthquakes in Haiti, Chile, and China are tragic reminders of the critical need for improved methods of predicting natural disasters. Drawing on their vast practical experience and theoretical studies, Dr. Yi Lin and Professor Shoucheng OuYang examine some of the problems that exist in the modern system of science to provide the understanding required to improve our ability to forecast and prepare for such events.

Presenting a series of new understandings, theories, and a new system of methodology, **Irregularities and Prediction of Major Disasters** simplifies the world-class problem of prediction into a series of tasks that can be learned, mastered, and applied in the analysis and prediction of forthcoming changes in materials or fluids. These internationally respected authors introduce their novel method of digitization for dealing with irregular information, proven effective for predicting transitional changes in events. They also:

- Unveil a new methodology for forecasting zero-probability natural disasters
- Highlight the reasons for common forecasting failures
- Propose a method for resolving the mystery of nonlinearity
- Include numerous real-life case studies that illustrate how to properly digitize available information
- Supply proven methods for forecasting small-probability natural disasters

This authoritative resource provides a systematic discussion of the non-evolutionality of the modern system of science—analyzing its capabilities and limitations. By touching on the need for change in some of the

fundamentals in basic scientific theories and relevant methodologies, this book provides the scientific community with the understanding and methodology required to forecast zero-probability major disasters with greatly improved accuracy.

### **From reader reviews:**

#### **Alex Lynch:**

Why don't make it to become your habit? Right now, try to prepare your time to do the important take action, like looking for your favorite publication and reading a guide. Beside you can solve your long lasting problem; you can add your knowledge by the book entitled Irregularities and Prediction of Major Disasters (Systems Evaluation, Prediction, and Decision-Making). Try to stumble through book Irregularities and Prediction of Major Disasters (Systems Evaluation, Prediction, and Decision-Making) as your good friend. It means that it can to be your friend when you truly feel alone and beside regarding course make you smarter than previously. Yeah, it is very fortunated for yourself. The book makes you a lot more confidence because you can know everything by the book. So , let's make new experience in addition to knowledge with this book.

#### **Robert Jenkins:**

Have you spare time for just a day? What do you do when you have considerably more or little spare time? That's why, you can choose the suitable activity for spend your time. Any person spent their particular spare time to take a go walking, shopping, or went to typically the Mall. How about open or maybe read a book allowed Irregularities and Prediction of Major Disasters (Systems Evaluation, Prediction, and Decision-Making)? Maybe it is being best activity for you. You already know beside you can spend your time using your favorite's book, you can better than before. Do you agree with it has the opinion or you have additional opinion?

#### **Mary Davis:**

The book Irregularities and Prediction of Major Disasters (Systems Evaluation, Prediction, and Decision-Making) will bring someone to the new experience of reading the book. The author style to spell out the idea is very unique. If you try to find new book to see, this book very suited to you. The book Irregularities and Prediction of Major Disasters (Systems Evaluation, Prediction, and Decision-Making) is much recommended to you to learn. You can also get the e-book in the official web site, so you can quickly to read the book.

#### **Orville Norman:**

Do you have something that you enjoy such as book? The reserve lovers usually prefer to decide on book like comic, short story and the biggest you are novel. Now, why not seeking Irregularities and Prediction of Major Disasters (Systems Evaluation, Prediction, and Decision-Making) that give your enjoyment preference will be satisfied by simply reading this book. Reading routine all over the world can be said as the method for people to know world a great deal better then how they react towards the world. It can't be said constantly that reading routine only for the geeky person but for all of you who wants to always be success person. So , for all of you who want to start reading as your good habit, it is possible to pick Irregularities and Prediction of Major Disasters (Systems Evaluation, Prediction, and Decision-Making) become your own personal

starter.
