Porous and Complex Flow Structures in Modern Technologies Adrian Bejan, Ibrahim Dincer, Sylvie Lorente, Antonio Miguel, Heitor Reis

Porous and Complex Flow Structures in Modern Technologies represents a new approach to the field, considering the fundamentals of porous media in terms of the key roles played by these materials in modern technology. Intended as a text for advanced undergraduates and as a reference for practicing engineers, the book uses the physics of flows in porous materials to tie together a wide variety of important issues from such fields as biomedical engineering, energy conversion, civil engineering, electronics, chemical engineering, and environmental engineering. Thus, for example, flows of water and oil through porous ground play a central role in energy exploration and recovery (oil wells, geothermal fluids), energy conversion (effluents from refineries and power plants), and environmental engineering (leachates from waste repositories).

Similarly, the demands of miniaturization in electronics and in biomedical applications are driving research into the flow of heat and fluids through small-scale porous media (heat exchangers, filters, gas exchangers). Filters, catalytic converters, the drying of stored grains, and a myriad of other applications involve flows through porous media.

By providing a unified theoretical framework that includes not only the traditional homogeneous and isotropic media but also models in which the assumptions of representative elemental volumes or global thermal equilibrium fail, the book provides practicing engineers the tools they need to analyze complex situations that arise in practice. This volume includes examples, solved problems and an extensive glossary of symbols.

From reader reviews:

Travis Ralls:

Reading a guide can be one of a lot of activity that everyone in the world adores. Do you like reading book therefore. There are a lot of reasons why people like it. First reading a publication will give you a lot of new facts. When you read a reserve you will get new information because book is one of numerous ways to share the information or maybe their idea. Second, studying a book will make a person more imaginative. When you reading through a book especially tale fantasy book the author will bring someone to imagine the story how the characters do it anything. Third, you could share your knowledge to other folks. When you read this Porous and Complex Flow Structures in Modern Technologies, you could tells your family, friends in addition to soon about yours reserve. Your knowledge can inspire the others, make them reading a publication.

Jean Parks:

Porous and Complex Flow Structures in Modern Technologies can be one of your basic books that are good idea. We recommend that straight away because this e-book has good vocabulary that will increase your knowledge in terminology, easy to understand, bit entertaining but still delivering the information. The writer giving his/her effort to get every word into delight arrangement in writing Porous and Complex Flow Structures in Modern Technologies nevertheless doesn't forget the main stage, giving the reader the hottest along with based confirm resource facts that maybe you can be certainly one of it. This great information can certainly drawn you into new stage of crucial pondering.

Henry Carlino:

Your reading 6th sense will not betray a person, why because this Porous and Complex Flow Structures in Modern Technologies e-book written by well-known writer we are excited for well how to make book that can be understand by anyone who read the book. Written in good manner for you, dripping every ideas and publishing skill only for eliminate your own personal hunger then you still uncertainty Porous and Complex Flow Structures in Modern Technologies as good book not simply by the cover but also with the content. This is one guide that can break don't assess book by its cover, so do you still needing one more sixth sense to pick that!? Oh come on your looking at sixth sense already told you so why you have to listening to yet another sixth sense.

Cindy Mattis:

Reading a guide make you to get more knowledge from the jawhorse. You can take knowledge and information from a book. Book is composed or printed or illustrated from each source this filled update of news. In this modern era like today, many ways to get information are available for you. From media social like newspaper, magazines, science guide, encyclopedia, reference book, new and comic. You can add your understanding by that book. Are you ready to spend your spare time to spread out your book? Or just looking

for the Porous and Complex Flow Structures in Modern Technologies when you essential it?
