## **Handbook of Fiber Optic Data Communication: Chapter 13. Network Architectures and Overlay Networks** Casimer DeCusatis

In recent years, there have been many new approaches to data networking protocols, both industry standard and vendor proprietary. In this chapter, we will begin with an overview of conventional networking protocols, such as the Spanning Tree Protocol and multichassis link aggregation, and network design approaches like equal cost multipath spine–leaf. We will then review several more recent proposals for addressing the requirements of a flattened, Layer 2 network infrastructure. We discuss Transparent Interconnection of Lots of Links (TRILL) and Shortest Path Bridging, as well as both industry standard and proprietary network options including Open Data Center Interoperable Network (ODIN), Qfabric, FabricPath, and Virtual Cluster Switching (VCS). Overlays including Virtual Extensible LAN (VXLAN), Network Virtualization Generic Routing Encapsulation (NVGRE), Distributed Overlay Virtual Ethernet (DOVE), and others will also be discussed.

### **From reader reviews:**

#### **Ronnie Hamilton:**

Have you spare time for a day? What do you do when you have much more or little spare time? Yep, you can choose the suitable activity intended for spend your time. Any person spent their spare time to take a go walking, shopping, or went to often the Mall. How about open or even read a book called Handbook of Fiber Optic Data Communication: Chapter 13. Network Architectures and Overlay Networks? Maybe it is being best activity for you. You already know beside you can spend your time using your favorite's book, you can cleverer than before. Do you agree with the opinion or you have some other opinion?

#### **Lizzie Chandler:**

As people who live in often the modest era should be update about what going on or information even knowledge to make them keep up with the era that is certainly always change and move ahead. Some of you maybe will probably update themselves by studying books. It is a good choice for you but the problems coming to anyone is you don't know what kind you should start with. This Handbook of Fiber Optic Data Communication: Chapter 13. Network Architectures and Overlay Networks is our recommendation to cause you to keep up with the world. Why, since this book serves what you want and wish in this era.

#### **Janet Huynh:**

Handbook of Fiber Optic Data Communication: Chapter 13. Network Architectures and Overlay Networks can be one of your starter books that are good idea. We recommend that straight away because this e-book has good vocabulary that will increase your knowledge in terminology, easy to understand, bit entertaining however delivering the information. The author giving his/her effort that will put every word into satisfaction arrangement in writing Handbook of Fiber Optic Data Communication: Chapter 13. Network Architectures and Overlay Networks nevertheless doesn't forget the main level, giving the reader the hottest as well as based confirm resource facts that maybe you can be one of it. This great information can easily drawn you into brand-new stage of crucial thinking.

#### **Cynthia Necaize:**

That book can make you to feel relax. That book Handbook of Fiber Optic Data Communication: Chapter 13. Network Architectures and Overlay Networks was colorful and of course has pictures on there. As we know that book Handbook of Fiber Optic Data Communication: Chapter 13. Network Architectures and Overlay Networks has many kinds or style. Start from kids until adolescents. For example Naruto or Private investigator Conan you can read and believe that you are the character on there. Therefore , not at all of book are make you bored, any it can make you feel happy, fun and rest. Try to choose the best book for you and try to like reading that.
