Remembering our Childhood: How Memory Betrays Us Karl Sabbagh

In this fascinating and sometimes disturbing book, the well-known writer Karl Sabbagh looks at psychologists' present understanding of the nature of memory, especially recollections of childhood, and how, in cases of so-called 'recovered memories', the unreliability and flexibility of memory has led to tragic consequences, destroying the lives of whole families.

All of us have memories of childhood - that special trip to the fair, or impressions, such as dappled sunlight through rustling leaves seen from the pram. Some people firmly believe that they can recall scenes from the time they were babies. But what does science tell us about the nature of memory, and memories of childhood? In the first part of this book, Sabbagh begins gently with examples he has collected from many interviews of earliest memories, and goes on to look at psychologists' and neuroscientists' understanding of memory. It becomes clear that, whatever individuals might claim, memories of the first two years or so of our lives are simply not accessible to us, while later memories are fragile, yielding to suggestion and our inclination towards a neat story. All too often, our 'memory' of an event arises from what we have been told by a relative. The book then turns to darker territory. A casual remark by a child at a nursery leads to detailed and suggestive questioning of a number of children, resulting in the arrest of a teacher accused of child abuse. She was subsequently released. Some patients with eating and mood disorders undergoing therapy have come to believe, or have been led to believe by the therapist, that their problems stem from being sexually abused as a child - memories allegedly repressed and only 'recovered' under the guidance of the therapist. Such claims have again resulted in wrongful arrest, subsequently overturned, though the damage done to the families is irreparable. Sabbagh has interviewed the distinguished psychologist Elizabeth Loftus and others involved in blowing the whistle on the 'recovered memory' movement. Throughout, the book is full of quotations from interviews and extracts from transcribed interviews presented at court, making this a powerful and vivid account.

While other books have been written on the dangers of the concept of recovered memory, Sabbagh here puts the story in the wider perspective of our growing scientific understanding of memory, and argues strongly for the critical role of scientific evidence in cases involving the memory of witnesses.

Odessa Currie:

Would you one of the book lovers? If so, do you ever feeling doubt when you are in the book store? Try to pick one book that you just dont know the inside because don't determine book by its include may doesn't work here is difficult job because you are afraid that the inside maybe not because fantastic as in the outside search likes. Maybe you answer could be Remembering our Childhood: How Memory Betrays Us why because the fantastic cover that make you consider about the content will not disappoint you. The inside or content is actually fantastic as the outside or cover. Your reading 6th sense will directly make suggestions to pick up this book.

Christine Smith:

This Remembering our Childhood: How Memory Betrays Us is great book for you because the content which is full of information for you who always deal with world and get to make decision every minute. This book reveal it details accurately using great organize word or we can point out no rambling sentences inside. So if you are read that hurriedly you can have whole data in it. Doesn't mean it only provides you with straight forward sentences but hard core information with wonderful delivering sentences. Having Remembering our Childhood: How Memory Betrays Us in your hand like finding the world in your arm, facts in it is not ridiculous just one. We can say that no e-book that offer you world with ten or fifteen tiny right but this book already do that. So , this is good reading book. Hey Mr. and Mrs. busy do you still doubt that?

Cody Chenault:

As a student exactly feel bored to reading. If their teacher inquired them to go to the library in order to make summary for some guide, they are complained. Just very little students that has reading's internal or real their passion. They just do what the trainer want, like asked to the library. They go to presently there but nothing reading really. Any students feel that reading through is not important, boring and also can't see colorful

pictures on there. Yeah, it is for being complicated. Book is very important for you personally. As we know that on this period, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore , this Remembering our Childhood: How Memory Betrays Us can make you sense more interested to read.
