## **Chemistry of The Environment** R.A. Bailey

Chemistry of the Environment provides a basic level of chemical knowledge on the principles of environmental chemistry and a general understanding of environmental problems. Organized into 17 chapters, this book is developed from the notes for a course in "Chemistry of the Environment" for juniors, seniors, and graduate students in Science and Engineering at Rensselaer Polytechnic Institute.

The opening chapters of this book discuss the problems related to waste disposal and energy production and the principles of atmospheric circulation and photochemical reactions, with an emphasis on the effects of human activities on the atmosphere and climate. Considerable chapters are devoted to various industries, including petroleum chlorinated hydrocarbons, pesticides, heavy metals, and nuclear chemistry, and the contributions of these industries to environmental problems. General topics on both natural and technological processes that impinge on the environment are explored. Other chapters discuss the principles of atmospheric photochemistry and the natural and artificial photochemical processes occurring in the biosphere. This book also examines the chemistry of some of the most important elements and how they relate to the properties of the environment and to biological effects. The concluding chapter provides insights into the nature, as well as the sources and the hazards of ionizing radiation in the environment, with particular emphasis on naturally occurring and artificial nuclear sources of ionizing radiation.

This book is of great benefit to environmental chemists and researchers, biochemists, and elementary organic chemists.

### **From reader reviews:**

#### **Jennifer Burritt:**

Book is to be different for each and every grade. Book for children till adult are different content. As it is known to us that book is very important normally. The book Chemistry of The Environment has been making you to know about other understanding and of course you can take more information. It is quite advantages for you. The e-book Chemistry of The Environment is not only giving you much more new information but also to be your friend when you really feel bored. You can spend your personal spend time to read your guide. Try to make relationship with the book Chemistry of The Environment. You never sense lose out for everything in case you read some books.

#### **Sheila Cyr:**

Now a day folks who Living in the era where everything reachable by interact with the internet and the resources in it can be true or not need people to be aware of each info they get. How individuals to be smart in acquiring any information nowadays? Of course the answer is reading a book. Reading a book can help individuals out of this uncertainty Information particularly this Chemistry of The Environment book because this book offers you rich facts and knowledge. Of course the details in this book hundred per-cent guarantees there is no doubt in it you know.

#### **Charles Steen:**

This book untitled Chemistry of The Environment to be one of several books that will best seller in this year, here is because when you read this guide you can get a lot of benefit upon it. You will easily to buy this kind of book in the book retail store or you can order it by using online. The publisher on this book sells the e-book too. It makes you more readily to read this book, since you can read this book in your Cell phone. So there is no reason to your account to past this book from your list.

#### **Tiffany Hernandez:**

A lot of book has printed but it differs from the others. You can get it by online on social media. You can choose the top book for you, science, comedy, novel, or whatever by searching from it. It is called of book Chemistry of The Environment. You can contribute your knowledge by it. Without making the printed book, it could possibly add your knowledge and make a person happier to read. It is most critical that, you must aware about publication. It can bring you from one destination to other place.
