Optimum Experimental Designs, with SAS (Oxford Statistical Science Series)

Anthony Atkinson, Alexander Donev, Randall Tobias

Optimum Experimental Designs, with SAS (Oxford Statistical Science Series) Anthony Atkinson, Alexander Donev, Randall Tobias

Experiments on patients, processes or plants all have random error, making statistical methods essential for their efficient design and analysis. This book presents the theory and methods of optimum experimental design, making them available through the use of SAS programs. Little previous statistical knowledge is assumed. The first part of the book stresses the importance of models in the analysis of data and introduces least squares fitting and simple optimum experimental designs. The second part presents a more detailed discussion of the general theory and of a wide variety of experiments. The book stresses the use of SAS to provide hands-on solutions for the construction of designs in both standard and non-standard situations. The mathematical theory of the designs is developed in parallel with their construction in SAS, so providing motivation for the development of the subject. Many chapters cover self-contained topics drawn from science, engineering and pharmaceutical investigations, such as response surface designs, blocking of experiments, designs for mixture experiments and for nonlinear and generalized linear models.

Understanding is aided by the provision of "SAS tasks" after most chapters as well as by more traditional exercises and a fully supported website. The authors are leading experts in key fields and this book is ideal for statisticians and scientists in academia, research and the process and pharmaceutical industries.

From reader reviews:

David Cain:

Why? Because this Optimum Experimental Designs, with SAS (Oxford Statistical Science Series) is an unordinary book that the inside of the guide waiting for you to snap the item but latter it will distress you with the secret the idea inside. Reading this book alongside it was fantastic author who else write the book in such amazing way makes the content interior easier to understand, entertaining method but still convey the meaning totally. So , it is good for you because of not hesitating having this any more or you going to regret it. This book will give you a lot of gains than the other book include such as help improving your ability and your critical thinking way. So , still want to hold off having that book? If I had been you I will go to the reserve store hurriedly.

Joseph Lewis:

Are you kind of stressful person, only have 10 or perhaps 15 minute in your morning to upgrading your mind expertise or thinking skill possibly analytical thinking? Then you have problem with the book in comparison with can satisfy your small amount of time to read it because pretty much everything time you only find guide that need more time to be learn. Optimum Experimental Designs, with SAS (Oxford Statistical Science Series) can be your answer as it can be read by anyone who have those short extra time problems.

Norma Wilson:

Is it an individual who having spare time subsequently spend it whole day through watching television programs or just lying on the bed? Do you need something totally new? This Optimum Experimental Designs, with SAS (Oxford Statistical Science Series) can be the answer, oh how comes? A fresh book you know. You are so out of date, spending your time by reading in this brand-new era is common not a geek activity. So what these books have than the others?

Kristy Moore:

You will get this Optimum Experimental Designs, with SAS (Oxford Statistical Science Series) by go to the bookstore or Mall. Just simply viewing or reviewing it can to be your solve difficulty if you get difficulties to your knowledge. Kinds of this publication are various. Not only by means of written or printed but also can you enjoy this book by e-book. In the modern era including now, you just looking of your mobile phone and searching what their problem. Right now, choose your current ways to get more information about your reserve. It is most important to arrange yourself to make your knowledge are still change. Let's try to choose appropriate ways for you.
