Multiple Factor Analysis by Example Using R (Chapman & Hall/CRC The R Series) Jérôme Pagès

Multiple factor analysis (MFA) enables users to analyze tables of individuals and variables in which the variables are structured into quantitative, qualitative, or mixed groups. Written by the co-developer of this methodology, **Multiple Factor Analysis by Example Using R** brings together the theoretical and methodological aspects of MFA. It also includes examples of applications and details of how to implement MFA using an R package (FactoMineR).

The first two chapters cover the basic factorial analysis methods of principal component analysis (PCA) and multiple correspondence analysis (MCA). The next chapter discusses factor analysis for mixed data (FAMD), a little-known method for simultaneously analyzing quantitative and qualitative variables without group distinction. Focusing on MFA, subsequent chapters examine the key points of MFA in the context of quantitative variables as well as qualitative and mixed data. The author also compares MFA and Procrustes analysis and presents a natural extension of MFA: hierarchical MFA (HMFA). The final chapter explores several elements of matrix calculation and metric spaces used in the book.

From reader reviews:

Javier Link:

The book Multiple Factor Analysis by Example Using R (Chapman & Hall/CRC The R Series) gives you the sense of being enjoy for your spare time. You should use to make your capable a lot more increase. Book can for being your best friend when you getting anxiety or having big problem with your subject. If you can make looking at a book Multiple Factor Analysis by Example Using R (Chapman & Hall/CRC The R Series) being your habit, you can get a lot more advantages, like add your capable, increase your knowledge about many or all subjects. You are able to know everything if you like open up and read a e-book Multiple Factor Analysis by Example Using R (Chapman & Hall/CRC The R Series). Kinds of book are a lot of. It means that, science publication or encyclopedia or other individuals. So , how do you think about this book?

Jennie Groth:

The book Multiple Factor Analysis by Example Using R (Chapman & Hall/CRC The R Series) can give more knowledge and information about everything you want. So just why must we leave a good thing like a book Multiple Factor Analysis by Example Using R (Chapman & Hall/CRC The R Series)? Several of you have a different opinion about book. But one aim which book can give many information for us. It is absolutely suitable. Right now, try to closer using your book. Knowledge or facts that you take for that, you can give for each other; you are able to share all of these. Book Multiple Factor Analysis by Example Using R (Chapman & Hall/CRC The R Series) has simple shape but you know: it has great and massive function for you. You can search the enormous world by open up and read a publication. So it is very wonderful.

Grace Godwin:

Precisely why? Because this Multiple Factor Analysis by Example Using R (Chapman & Hall/CRC The R Series) is an unordinary book that the inside of the reserve waiting for you to snap the idea but latter it will surprise you with the secret this inside. Reading this book adjacent to it was fantastic author who also write the book in such amazing way makes the content inside of easier to understand, entertaining way but still convey the meaning fully. So , it is good for you for not hesitating having this ever again or you going to regret it. This unique book will give you a lot of advantages than the other book have such as help improving your skill and your critical thinking technique. So , still want to hold up having that book? If I were being you I will go to the publication store hurriedly.

George Jamison:

Reading a book for being new life style in this year; every people loves to learn a book. When you examine a book you can get a great deal of benefit. When you read guides, you can improve your knowledge, mainly because book has a lot of information on it. The information that you will get depend on what forms of book that you have read. If you need to get information about your study, you can read education books, but if you act like you want to entertain yourself look for a fiction books, these kinds of us novel, comics, and also

soon. The Multiple Factor Analysis by Example Using R (Chapman & Hall/CRC The R Series) offer you a new experience in studying a book.
