Autonomic Neurology (Contemporary Neurology Series)

Autonomic Neurology (Contemporary Neurology Series)

The purpose of this book is to present a focused approach to the pathophysiology, diagnosis, and management of the most common autonomic disorders that may present to the clinical neurologist. *Autonomic Neurology* is divided into 3 sections. The first section includes 5 chapters reviewing the anatomical and biochemical mechanisms of central and peripheral nervous system control of autonomic function, principles of autonomic pharmacology, and a clinical and laboratory approach to the diagnosis of autonomic disorders. The second section focuses on the pathophysiology and management of orthostatic hypotension, postural tachycardia, baroreflex failure; syncope, disorders of sweating, neurogenic bladder and sexual dysfunction, gastrointestinal dysmotility, and autonomic hyperactivity. The final section is devoted to specific autonomic disorders, including central neurodegenerative disorders; common peripheral neuropathies with prominent autonomic failure; painful small fiber neuropathies; autoimmune autonomic ganglionopathies and neuropathies; focal brain disorders; focal spinal cord disorders; and chronic pain disorders with autonomic manifestations.

This book is the product of the extensive experience of its contributors in the evaluation and management of the many patients with autonomic symptoms who are referred for neurologic consultation at Mayo Clinic in Rochester, Minnesota. *Autonomic Neurology* focuses on clinical scenarios and presentation of clinical cases and includes several figures showing the results of normal and abnormal autonomic testing in typical conditions. Its abundance of tables summarizing the differential diagnosis, testing, and management of autonomic disorders also help set this book apart from other books focused on the autonomic nervous system.

That publication can make you to feel relax. This kind of book Autonomic Neurology (Contemporary Neurology Series) was colourful and of course has pictures on the website. As we know that book Autonomic Neurology (Contemporary Neurology Series) has many kinds or category. Start from kids until youngsters. For example Naruto or Private eye Conan you can read and believe that you are the character on there. So, not at all of book are make you bored, any it makes you feel happy, fun and rest. Try to choose the best book for yourself and try to like reading that.

Ida Johnson:

As a scholar exactly feel bored to help reading. If their teacher expected them to go to the library or even make summary for some e-book, they are complained. Just tiny students that has reading's heart and soul or real their leisure activity. They just do what the educator want, like asked to go to the library. They go to presently there but nothing reading really. Any students feel that studying is not important, boring as well as can't see colorful pics on there. Yeah, it is to get complicated. Book is very important for you personally. As we know that on this age, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore this Autonomic Neurology (Contemporary Neurology Series) can make you experience more interested to read.
