The Mjølfnir Impact Event and its Consequences: Geology and Geophysics of a Late Jurassic/Early Cretaceous Marine Impact Event (Impact Studies)

The Mjølfnir Impact Event and its Consequences: Geology and Geophysics of a Late Jurassic/Early Cretaceous Marine Impact Event (Impact Studies)

The Mjølfnir impact structure was recognized in 1993 and included in the Earth Impact Database in 1996, based on the discoveries of unequivocal meteorite impact indicators such as shocked quartz, Ir-enrichments, possible glass remnants, fragments of nickel-rich iron oxides, in addition to the convincing complex crater shape of the structure. This book presents the geological and geophysical history of the Barents Sea region along with the discovery of the Mjølfnir impact crater. We place the Mjølfnir event into the geological framework of the region and present elaborative numerical models of its formation and associated tsunami generation. The book represents an update and synthesis as well as the complete compilation of the Mjølfnir crater studies.

From reader reviews:

Steven Allen:

Why don't make it to become your habit? Right now, try to ready your time to do the important take action, like looking for your favorite reserve and reading a book. Beside you can solve your trouble; you can add your knowledge by the e-book entitled The Mjølfnir Impact Event and its Consequences: Geology and Geophysics of a Late Jurassic/Early Cretaceous Marine Impact Event (Impact Studies). Try to make book The Mjølfnir Impact Event and its Consequences: Geology and Geophysics of a Late Jurassic/Early Cretaceous Marine Impact Event (Impact Studies) as your good friend. It means that it can being your friend when you sense alone and beside those of course make you smarter than in the past. Yeah, it is very fortunated for yourself. The book makes you much more confidence because you can know every thing by the book. So , let us make new experience and also knowledge with this book.

Jacqueline Britt:

The Mjølfnir Impact Event and its Consequences: Geology and Geophysics of a Late Jurassic/Early Cretaceous Marine Impact Event (Impact Studies) can be one of your starter books that are good idea. Most of us recommend that straight away because this book has good vocabulary that can increase your knowledge in terminology, easy to understand, bit entertaining but delivering the information. The article writer giving his/her effort that will put every word into delight arrangement in writing The Mjølfnir Impact Event and its Consequences: Geology and Geophysics of a Late Jurassic/Early Cretaceous Marine Impact Event (Impact Studies) but doesn't forget the main level, giving the reader the hottest and also based confirm resource info that maybe you can be among it. This great information can easily drawn you into new stage of crucial contemplating.

Jacqueline Thompson:

This The Mjølfnir Impact Event and its Consequences: Geology and Geophysics of a Late Jurassic/Early Cretaceous Marine Impact Event (Impact Studies) is new way for you who has intense curiosity to look for some information because it relief your hunger details. Getting deeper you on it getting knowledge more you know or else you who still having bit of digest in reading this The Mjølfnir Impact Event and its Consequences: Geology and Geophysics of a Late Jurassic/Early Cretaceous Marine Impact Event (Impact Studies) can be the light food in your case because the information inside that book is easy to get by anyone. These books acquire itself in the form which is reachable by anyone, sure I mean in the e-book contact form. People who think that in publication form make them feel drowsy even dizzy this e-book is the answer. So there is absolutely no in reading a e-book especially this one. You can find actually looking for. It should be here for anyone. So , don't miss the idea! Just read this e-book kind for your better life in addition to knowledge.

Antonio Sisson:

What is your hobby? Have you heard in which question when you got students? We believe that that question was given by teacher on their students. Many kinds of hobby, Everyone has different hobby. Therefore you know that little person like reading or as reading through become their hobby. You need to know that reading is very important and book as to be the issue. Book is important thing to provide you knowledge, except your teacher or lecturer. You will find good news or update in relation to something by book. Many kinds of books that can you go onto be your object. One of them is this *The Mjølnir Impact Event and its Consequences: Geology and Geophysics of a Late Jurassic/Early Cretaceous Marine Impact Event (Impact Studies)*.
